

Beginning March 25, 2020, we are routing production and non-production traffic to different instances of the gateway.

What is changing?

We are standing up a new, **non-prod** instance of the gateway. When you publish your non-prod endpoints, uncheck the **Gateway version** checkbox in the self-service UI.

The state of the **Gateway version** checkbox determines the instance of the gateway where your endpoints are published: the prod instance (<https://api-gateway.linkhealth.com>) or the non-prod instance (<https://api-gateway-nonprod.linkhealth.com>). Note the difference in the URLs.

For PROD Endpoints:

API Gateway Endpoint	Gateway Version
<input type="text" value="https://api-gateway.linkhealth.com/"/>	<input checked="" type="checkbox"/> This is a PROD endpoint

For Non-Prod Endpoints:

API Gateway Endpoint	Gateway Version
<input type="text" value="https://api-gateway-nonprod.linkhealth.com/"/>	<input type="checkbox"/> This is a PROD endpoint

Why are we making this change?

Separating prod from non-prod traffic helps us:

- Allows us to serve you better by maintaining desired service levels on the prod gateway
- Allows a single self-service UI to manage both prod and non-prod endpoints on the gateway
- Allows you to performance test your APIs on the non-prod gateway.

What do I need to do?

Review the table to find what action you need to take, if any.

If you ...	Action required
Are an API Publisher	<ul style="list-style-type: none">• Login to the self-service UI and confirm the status of the Gateway Version checkbox for each endpoint.• Update the non-prod gateway URL in all of your code, test scripts, etc.
Are an API Consumer	Update the non-prod gateway URL in all of your code, including test scripts, etc., in coordination with the API Publisher.

When do I need to update my endpoints?

You can start updating your endpoints March 25, 2020. Please complete the update of all endpoints by April 8, 2020.

What if I can't update my endpoint in time?

If you cannot update your endpoints by April 8, 2020, Link will update the endpoints for you. We will assume all service IDs that include any variants of -dev, -test, -stage are non-prod endpoints. This is a breaking change for you and for your non-prod consumers.

What if I have more questions?

If our [documentation](#) doesn't answer your questions or you need further assistance, reach out to the Link API Gateway Tier 2 support group via Service-Now.

Visit us anytime at [Link News and Releases](#) for the most up-to-date information about Link.

Thanks
