Beginning June 1, 2020, we are integrating Link Framework Services with Secure and are federating your Optum ID with your MSID. You will be able to use either one to access the Link API Gateway self-service UI.

What is changing?

Link is integrating with Optum's Secure to provision and manage user access to the Link platform. Your access information will be loaded into Secure and your MSID will be federated with your existing Optum ID in Link Identity Exchange (IDX). Then you will be able to use either your Optum ID or your MSID to sign-in to the Link API Gateway self-service UI.

Why are we making this change?

Integrating with Secure to provision and manage user access is an organization mandate. After the integration is complete, Link can seamlessly manage access for internal users and perform the annual entitlement review and attestation of access to the Link platform.

What do I need to do?

Nothing. During the integration and federation process, you will receive several emails from Secure and Link Security.

After the process is complete, you can sign-in to the Link API Gateway self-service UI with either your existing Optum ID or your MSID. All new user access requests will go through Secure.

What if I have more questions?

Reach out to the Link API Gateway Tier 2 support group via Service-Now for further assistance.

Visit us anytime at **Link News and Releases** for the most up-to-date information about Link.

Thanks
Link Administrator
